Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-52, drawn to a first copolyester film, classified in class 428, subclass 480+.
 - II. Claims 53-94, drawn to a second polyester film, classified in class 428, subclass 304.4+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a barrier film. See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1773

4. This application contains claims directed to the following categories (a)-(b) of patentably distinct species:

(a) mechanical properties:

- (1) modulus ratio (e.g., claims 23-28);
- (2) break strain in machine direction (e.g., claims 29-34);
- (3) break strain in the transverse direction (e.g., claims 35-40);
- (4) break stress in machine direction (e.g., claims 41-52);

(b) barrier properties:

- (1) hydrostatic pressure resistance (e.g., claims 75-78);
- (2) water vapor transmission rate (e.g., claims 79-82);
- (3) modulus of elasticity (e.g., claims 83-85);
- (4) break strain in machine direction (e.g., claims 86-88);
- (5) break strain in cross direction (e.g., claims 89-91);
- (6) break stress (e.g., claims 92-94).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species *in each category (a)-(b)* for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1-22, 52-74 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1773

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Due to the number of species and invention, this restriction/election requirement is made in written form.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1773

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vivian Chen whose telephone number is (571) 272-1506. The examiner can normally be reached on Monday through Thursday from 8:30 AM to 6 PM. The examiner can also be reached on alternate Fridays.
